

12-Week Python Learning & Earning Plan

WEEK 1-2: Python Basics Bootcamp

- Goal: Understand core Python syntax and write simple programs.
- Topics: Variables, data types, conditionals, loops, functions, lists, dictionaries, strings, .py files.
- Videos:
 - Python Full Course for Beginners (freeCodeCamp - 4h)
 - Python Functions - Bro Code
- Projects: Number guessing game, To-do list in terminal, Rock-paper-scissors game

WEEK 3: File Handling + Practice Projects

- Goal: Learn to work with files, and build small tools.
- Topics: open(), read/write files, CSVs, exception handling.
- Videos:
 - Read & Write Files in Python - Bro Code
 - Automate the Boring Stuff - File Handling
- Projects: Personal journal, budget tracker, quote saver

WEEK 4: GitHub + First Portfolio Project

- Goal: Learn Git/GitHub and build your first portfolio project.
- Topics: Git basics, Markdown for README.md, code organization.
- Videos:
 - Git & GitHub for Beginners - freeCodeCamp
 - Build a Python To-Do App (YouTube)
- Projects: Clean to-do app pushed to GitHub with proper README

WEEK 5-6: Automation + Scripting

- Goal: Automate tasks and prepare for gig work.

- Topics: File renaming, folder organizing, Excel, web scraping.
- Videos:
 - Automate the Boring Stuff Playlist
 - Web Scraping with BeautifulSoup - Tech with Tim
- Projects: Folder organizer, file renamer, quote scraper

WEEK 7-8: Pick a Money-Making Path

- Goal: Choose your lane and build skill in it.
- Paths:
 - 1. Freelance Automator
 - 2. Data Analyst
 - 3. Web Developer
- Each has custom videos and a main project

WEEK 9-10: Portfolio, Profile, and Online Presence

- Goal: Build your online reputation.
- Tasks: GitHub portfolio, Notion site or GitHub Pages, Bio
- Videos: How to Make a GitHub Portfolio - The AI Engineer

WEEK 11-12: Monetization Time

- Goal: Make your first dollar.
- Platforms: Fiverr, Upwork, Reddit (r/forhire, r/slavelabour)
- Gig Ideas:
 - Automate Excel or CSV tasks
 - Scrape product data
 - Clean/analyze data
- Video: How to Make Money with Python (Realistic Tips)

WEEKLY COMMITMENT

- 2 hrs/day = 14 hrs/week
- Code every day
- Push all work to GitHub
- Share your projects online
